ITD Alliance
Global Alliance for
Inter- and Transdisciplinarity

Professor Tarek Elkhooly
Director of Nanomedicine Research Unit, Faculty of Medicine
Delta University
By e-mail: tarek.elkhooly@gmail.com

Dear Professor Elkhooly,

I am delighted by your positive response to my invitation to join the ITD Alliance President's Committee on the Global Advancement of Inter- and Transdisciplinarity.

Membership of this newly established committee is by invitation only and is for 12 months in the first instance. The committee's primary aim is to support the growth of inter- and transdisciplinary as a global endeavour by recognising and providing a "home" for, as well as supporting and strengthening, different approaches to inter- and transdisciplinarity around the world.

This is a committee focused on action, rather than meetings, with members undertaking different activities.

Your advice and collaboration will be particularly valued on the following two issues:

- Supporting the Egyptian National Interdisciplinary Network (ENIN) in becoming a member of the ITD Alliance and in maximising the benefits and opportunities of membership
- Helping establish a Middle East and North Africa regional network of the ITD Alliance, including exploring feasibility, developing aims, and devising activities that will strengthen such a network and benefit inter- and transdisciplinary institutions and individuals in the region.

I look forward to working with you on these important endeavours

Your sincerely,

Gabriele Bammer
Professor and President
