

Strengthen the means of implementation and revitalize the Global Partnership for Sustainable Development.

Strategy and Objectives

Partnership to achieve sustainability strengthen the means of implementation of all the SDGs. We believe that establishing alliances between universities and industry, public society, and more importantly with governmental entities at domestic and international levels is required to deal with the complexity of societal problems and pave the way for sustainable future. The intercultural dimension behind partnership helps our students to acquire rigorous scientific attitude, spirit of curiosity, and entrepreneurialism necessary to find the answers needed for problems in sustainable development.

We all must work together to support the achievement of all sustainable development goals and Egypt's vision 2030 through our contributions to four strategic goals: high quality education, cutting-edge research, ground-breaking innovation, active engagement with civil society.

Collaboration with citizens, educators, members of the public and private sectors, university researchers, teachers, and students enables us to co-create knowledge that can lead to solutions to our societal problems which might be culture dependent but we all must learn from each other and find common solutions.

Awareness campaigns

Our Partners visit Delta University to raise awareness of the merits of the partnership. They educate and illuminate our university community, especially students with their goals and activities to assist local community and achieve sustainable development.

Egyptian Red Crescent

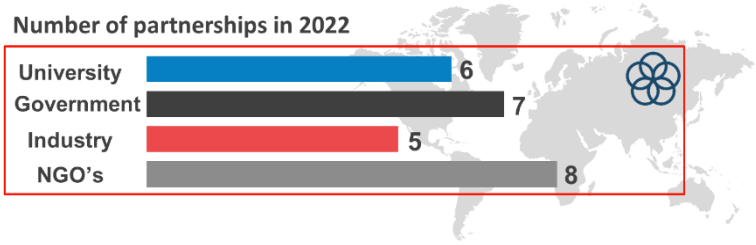

Community Outreach

Building robust partnerships with other universities, governmental institutions, NGOs, industry and stakeholders is essential for maintaining the sustainable development and to help fulfilling the unmet need of our staff, students and community.

To tackle poverty and provide health and educational services for people in rural and industrial areas, we collaborate with governmental institution such as Directorate of Health Affairs in Dakahliya, General Authority for Adult Education . (Health services report, adult literacy report)

To stop violence against women, we organized several events in 2022 in collaboration with general secretariat mental health and addiction treatment and Safe institution (NOG).

To promote high quality education for our students, we are signing collaboration agreements with NGO's, industry, stakeholders and educational companies such as Investors Association, Egypt Exchange, Adult Education authority, British Council, HP LIFE, Coursera, Industrial Area.

We also collaborate with international universities such as Plymouth University, University of Oradea, Hong Kong University, Synergy University, UCSI University, Open University Malaysia to promote dual degrees, student and staff exchange, and research collaboration in thematic related to real life problems.

To tackle hunger in local community, the chairman of the board of trustees of Delta University announced in his annual reward for research that he will provide funding for research projects that lead to enhancement of the production high quality wheat and rice in collaboration with the ministry of agriculture and he introduced a new reward for agriculture research for year 2023.

Stewardship

We have 1 large conference hall, 12 meeting rooms for university and faculty councils, more than 50 seminar rooms available for meeting with governmental and non-governmental stakeholders to build a string and robust partnership with them.

Student's commitment

Many of student societies at Delta University are usually a part of NGOs or larger national or global associations and societies in certain field of science. For instance, DSSS society is a part of IFMSA-Egypt, which is registered with its Constitution at the Egyptian Ministry of Social Solidarity under license number 3115-Alexandria. EPSF-Delta is a part of Egyptian Pharmaceutical Students' Federation (EPSF) and EADS-Delta is a part of Egyptian Association of Dental Societies (EADS). They all have the same objectives toward sustainable community. Other society such as Aliens is building robust collaboration with NGOs and charitable organizations to spread awareness of sustainability and help the people who are in most needs.

Our student societies support and work with each other to address common problems in local community. They benefit from our project-based sustainability courses that require and facilitate diverse interactions among students, instructors, stakeholders, and mentors.

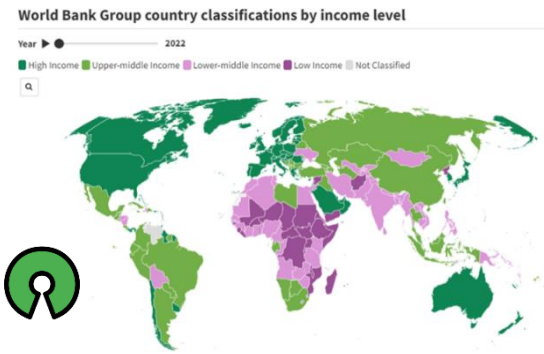

Two of student societies at Delta University collaborated in an event named 16 Day of Activism that aims to (1) Increase awareness of women rights. (2) Make women more aware of how to protect themselves.

Research

We believe that building research collaboration with researchers from low and lower-middle income countries is essential for sustainable development and intercultural learning. We have more than 200 publications with authors from countries with low resources in the subject areas of engineering and technology, computer science, life science, medicine and physical science. We have a bylaw in place to reward researchers from Delta University when they publish with those countries and we offer also support their research proposal funding.

Low-Income Countries	No. of Publications (2018-2022)	Lower-middle income countries	No. of Publications (2018-2022)
Yemen	27	India	95
Palestine	3	Algeria	39
Syrian Arab Republic	3	Tunisia	17
Kenya	3	Pakistan	14
Total	36	Jordan	7
		Viet Nam	4
		Iran	4
		Nigeria	3
		Armenia	3
